Personal summary

I am currently seeking an opportunity to begin my career within the digital sector. I have been interested in IT development since a young age. It's a process that taught me to be creative, resilient and become familiar with new software. It also incentivised me to communicate well with other people and solve problems in a creative and optimised way. I am keen to develop my learning through practical application within a work setting.

Education

Higher National Diploma (HND & HNC) in Computing
(Level 4, 5 and 6, 2021 – June, 2024)

BTEC Level 3 National Extended Diploma in Creative Digital Media Production
(Game development, 2019 – 2021)

Skills

Non-technical skills

- Native in English and Portuguese
- Problem solving
- Effective communication
- Teamwork
- Good organisational skills

Technical skills

- Web development (HTML, CSS, JavaScript and more recently React)
- 3D modelling & texturing
- High level understanding of Unity
- C# programming skills
- Photoshop skills

Experience

I have been undertaking part-time work at Wok Fusion over the past 5 years, as a kitchen porter which allowed me to improve my organisational skills since I had to allocate time between work during weekends, university work and passion projects during the week.

Some of the software I have become familiar with for both university and passion projects:

- Blender and Autodesk Maya
- Substance painter
- Visual Studio Code
- Unity
- Unreal engine
- Adobe Photoshop & Animate

Hobbies

- Game development
- Computer building
- 3D modelling
- Music and gaming
